

## **DR. SAMUEL D. WAKSAL**

Dr. Samuel D. Waksal is the founder and former CEO of the biopharmaceutical company ImClone Systems. He is also the founder of Kadmon Pharmaceuticals, which was financed with private capital and commenced operations in New York City in 2010. At ImClone, Waksal led the company to develop the cancer drug Erbitux (cetuximab). As of 2016 he was reported to hold executive positions with the New York Biotechnology Association and the New York Council for the Humanities, and is also a member of the board of advisors of Rockefeller University.
